WINNING THE FUTURE
THROUGH INNOVATION

DOMUS, A SMART DECISION

At Domus we have a strong commitment with the environment. We aim to find the perfect balance between Innovation, Efficiency and Savings, this was almost an obsession for us for the last few years. We have made a serious investment in R&D&I for the latest technology, developing features in each of the new

ranges of ECO-ENERGY washers, dryers and ironers. In this way, we created a new generation of low consumption, efficient and technologically really advanced equipment.

Our premise is evolution, effort and trust in our products and in our clients, in what we do and in how do we do it.

The perfect balance between INNOVATION, EFFICIENCY and SAVINGS

Water

Saving water and using it properly are our goals, we do not want to waste it. We offer washing machines with optimised design and programming as well as a unique accessory, the **ECOTANK**: water recovery tanks.

Energy

Energy optimisation is fundamental in a laundry. Our machines have been designed for greater energy savings with this in mind.

Chemicals

We design our washing machines with features to ensure the most accurate use of chemicals.

W WET CLEANING

SOLUTIONS

CLEAN & GO

A daring, modern and functional design to create and decorate your own self-service laundry. Thanks to the use of the most advanced technology in connectivity features, it is ideal for the easy management and full control of your business.

CLEAN & MOVE

DOMUS offers a system of fully transportable modules, equipped with laundry machines and with different configuration options. It allows the creation of customized laundry businesses for every client.

Clean & Move

By__Domus

CLEAN + US

Heavy Professional washers and dryers (8 and 10 kg), are ideal for small self-service businesses such as hairdressers, campsites, gyms, nurseries, hotels, etc.

CLEANROOM

Cleanrooms are used in areas sensitive to environmental contamination or in a medical research context. DOMUS is specialized in this field where linen should be processed on site, by producing equipment with specific cleanroom features. Barrier washers: 16 to 70 kg. Tumble dryers: 11 to 80 kg.

WET CLEANING

The Wet Cleaning system allows you to cleanse with water the most delicate garments. Thanks to our constant development, we get the best washing, drying and finishing programs, specially designed for garments that need the best treatment.
