WITH ENABLED REAR ROOM

All wiring concealed and possibility of manipulation of components through the rear.

For this purpose, it is recommended to drill a cavity in the wall respecting the fixing points of the Kiosk anchoring piece.

WALL WITHOUT REAR ROOM OR COLUMN

A cable outlet is required at the front, which contains the Ethernet cable, power supply and pulse wiring.

By opening a lock on the side, it is possible to move the whole assembly (leaving only the anchoring piece on the wall) in order to carry out maintenance of the components.

PRINTER OPTION

In order to facilitate the maintenance of the kiosks with printer, a lockable front opening has been fitted.

Not available on the 12'' Kiosk, this is especially designed for the quick replacement of printing paper.
